

FluidScan Upgrade

Improve Your Return on Investment with a Gen 6 Upgrade

Update your FluidScan to the latest version. This upgrade includes both hardware and software updates that bring significant improvements in performance, reliability and functionality.

| Hardware Updates | Features |
|-----------------------------------|--|
| Larger Screen | Increase in screen resolution of 200%, and viewing area of 30% for operational ease. |
| Faster CPU with additional memory | Increased from 32MB to 512MB |
| New Power Management | Charges 2X faster and will run 30% longer |
| Additional interconnect ports | Ethernet, USB 2.0 |
| LED sample illumination light | Checks for air bubbles prior to insertion of sample, automatically turns on/off through the software |
| Software Updates | Features |
| New software features | Improves ease of use to the operator, Driver updates, FluidScan is now recognized as a regular USB device, eliminating Windows Mobile Device Center |
| New Cell in/Cell out feature | Includes on-screen prompts and user notification |
| Oil Library Updates | <ul style="list-style-type: none"> ✓ Latest Factory Library (850+ fluids) and greater flexibility to modify factory fluids ✓ Factory fluids may now be standardized to known lab data if no user fluid is available ✓ New Fluid Category Engine -TDT (Tractor Drive Transmission Fluid) Features |
| Additional Features | Features |
| New Parameters | <ul style="list-style-type: none"> ✓ New "Fluid Integrity" parameter is a sum of spectral weights, analogous to type of dielectric measurement can be trended that to react to changes in oil condition or contamination ✓ New parameter for Biodiesel Fuel Dilution ✓ New parameter for Water Index for Grease |
| New Calibration Algorithms | Bio Diesel Calibration, Heavy duty diesel engines, LOD (2 sigma)- 1.4%, works with FDM combined for total BD/Diesel dilution engine oil |

Price: \$8,795

- Blue color now standard on all upgrades (yellow and green no longer supported)
- Includes a complete preventative maintenance service: (\$1800 value)
- One way return shipping and packaging (US only)
- Eligibility: FluidScan instruments with a Serial Number >HH500
- Units must be returned to the factory for service
