PicoQuant

High-end picosecond diode laser

- Enhanced power capability, new max. power mode
- Extended range of laser diode heads
- Repetition rates from 1 Hz to 100 MHz
- Calibrated optical power output with fine control
- Easy control via USB or local interface
- User-defined burst patterns; pulsed and CW operation
- Fine wavelength adjustment
- External trigger input
- 5-year warranty

Applications

- Time-resolved measurements
- Life science: FLIM, FCS, STED
- Material science & semiconductor diagnostics
- Metrology, calibration & ranging (LiDAR)
- Seeding
